5.0 Data Used:

5.1. Remote Sensing Data: IRS P6 LISS III along with Resourcesat -2 LISS IV data were used to map the wetlands. The spatial resolution of the data are 23.5 m and 4.8 m respectively. Single season data has been used for the purpose.

5.2 Other Data : Survey of India topographical maps (SOI) were used for reference purpose. RF boundaries are extracted from SOI maps. District administrative boundaries are taken from SOI as well as Revenue maps. lineage data of National Wetland maps at 1:50,000 scale and SIS-DP data derived at 1:10,000 scale using LISS IV date were used.
